

OPERATIONS & MAINTENANCE SERVICES AT NORDSEE OST

**Offshore Marine Management to deliver O&M services
under 5-year contract with RWE**

RWE Innogy contracted OMM for delivery of the following services at Nordsee Ost OWF:

- ▶ 24hr technical support line
- ▶ Inter array cable repair procedures
- ▶ Fault detection and diagnosis
- ▶ Emergency action response
- ▶ Mobilisation of repair spread and team within contractual time frame
- ▶ Repair operations, testing and re-protection of cable
- ▶ Non-emergency response
- ▶ Preventative maintenance
- ▶ Procurement of spare cable and products

Offshore Marine Management (OMM) was awarded a contract by RWE Innogy to deliver cable repair and maintenance services to the German Nordsee Ost offshore wind farm.

The five-year agreement involves OMM working in collaboration with the firm to provide essential structural and subsea services on its 295MW farm, with specific focus on the 60km of the array cable.

The scope of the work includes a range of O&M services including inter-array cable repair procedures; a 24hour technical support line; fault detection; emergency action responses; and repair operations as required.

“The cables are the central nervous system of the wind farm which makes it an essential element for its safe and economically efficient operation. In Offshore Marine Management we are pleased to have found an expert partner for our first wind farm off the German coast.”

**Sven Schulemann, General Manager of the
Nordsee Ost wind farm at RWE Innogy**
